

ANYAPPS-MACHINE TOOL WIRE-UL MTW

Mechanical Equipment Cable with UL MTW certification

应用

This series of products mainly used for rated voltage 1000 V (below)power plant, all kinds of machine tool wiring, or as electrical connections . In addition to meet AWM (equipment wiring materials) specification , also fits UL (MTW) mechanical equipment with special certification. MTW (mechanical tools wire) certification make the cable fully used in machine tool industry (not only is equipment). Fits UL 83, UL719 standards as well.

特点

(MTW)machine-tool-wire used as specially wire in mechanical equipment
With excellent thermal stability and mechanical strength, cold resistance, surface hardness and Bending strength, impact strength and wear resistance, chemical resistance, oil resistance, resistance to gasoline sex and self lubrication.

External light, easy to wear pipe.

operating temperature:below 105℃
Rated voltage:0.6/1KV
